## ABSTRACT

The selected bibliography on vocational education contains approximately 88 abstracts with indexing information explained to be drawn from the computer file of abstracts representing the Council for Exceptional Children Information Center's complete holdings as of August, 1972. Abstracts are said to be chosen using the criteria of availability of document to user, currency, information value, author's reputation, and classical content. Preliminary information explains how to read the abstract (a sample abstract is included which identifies the different parts of the abstract), how to use the author and subject indexes, how to purchase documents through the Educational Resources Information Center Document Reproduction Service (an order blank is provided), an order blank for Exceptional Child Education Abstracts in which the abstracts are originally published, a list of indexing terms searched to compile the bibliography, and a list of journals from which articles are abstracted for the bibliography. Publication date of documents abstracted ranges from 1962 to 1971. (CB)

## The CEC Information Center on Exceptional Children

With a grant from the US Office of Education, the CEC Information Center was established at The Council for Exceptional Children to serve as a comprehensive source of information on research, instructional materials, programs, administration, teacher education, methods, curriculum, etc. for the field of special education. The Center functions as the Clearinghouse on Exceptional Children in the Educational Resources Information Centers (ERIC) program and also as a member center in the Special Education IMC/RMC Network. In addition, the CEC Center's program includes a commitment to a concentrated effort towards the development of products which will interpret research results into educational methods and practices.

### How to Use This Bibliography

The *Exceptional Child Bibliography Series* was initiated by the CEC Information Center to answer the need for rapid responses to specific requests for information. The volume of information requests received by the Center is analyzed and used as a guide in preparing special topic bibliographies in the field of exceptional child education. Abstracts contained in the bibliographies are drawn from the computer file of abstracts which represents the CEC Information Center's complete holdings as of the date indicated on each bibliography.

Selective editing by Information Specialists is performed on each bibliography. From the total number of abstracts drawn from the file on a particular topic, selection is made of only those judged to best meet the following criteria: availability of the document to the user, currency, information value, author's reputation, and classical content. The number of abstracts selected to appear in a bibliography may vary from one to 100, depending on the amount of suitable information available. Updating of bibliographies as new material becomes available is accomplished when the volume of new material reaches 25 percent of presently available material on a given topic.

### How to Read the Abstract

Each abstract contains three sections—bibliographic data, descriptors, and a summary of the document. The bibliographic section provides the document's identifying number (ED and/or EC), publication date, author, title, source, and availability. The descriptors indicate the subjects with which a document deals. The summary provides a comprehensive overview of the document's contents and in some cases document availability is announced here.

### How to Use the Indexes

Some bibliographies in *Exceptional Children Bibliography Series* contain author and/or subject indexes. In these bibliographies, readers seeking work on a specific aspect of the general topic may consult the subject index to be referred to specific abstract numbers. Abstracts dealing with several topics may be identified by finding the same abstract number under two or more subjects in the subject index.

### How to Purchase Documents

Documents with an ED number and EDRS availability indicated may be purchased from the ERIC Document Reproduction Service (EDRS). For your convenience an order form is provided on the back cover of this bibliography.

Abstracts appearing in the bibliographies have also been published in *Exceptional Child Education Abstracts*, the quarterly abstract publication of the Council for Exceptional Children. Approximately 750 abstracts covering the broad range of exceptionality appear in each issue. (Subscription order form below.)

## ABSTRACTS

### ABSTRACT 10035

EC 01 0035 ED 010 926  
Publ. Date Mar 65 164p.

Deno, Evelyn  
**Retarded Youth, Their School-Rehabilitation Needs.**  
Minneapolis Public Schools, Minnesota  
EDRS mf,hc

Descriptors: exceptional child research; mentally handicapped; vocational education; rehabilitation programs; educable mentally handicapped; community services; adolescents; student evaluation; counseling; vocational rehabilitation; followup studies; student characteristics; program descriptions; guidance problems; student needs; Minneapolis

A 4-year rehabilitation project, developed to investigate means of alleviating deficiencies in school-rehabilitation services, is described. Through a series of research reports and demonstration projects this study evaluated programs preparing adolescent mentally retarded for employment, and at the same time facilitating coordination of community services and offering basic information and techniques. Substudies provide a description of the population served through the project. Followup data on former special class students provide information about work histories, health, sex, race, and the use of vocational and rehabilitation services by those clients. In addition to the data regarding characteristics, problems, and potential of the population served, descriptions of the training and guidance programs are provided. Implications in terms of diagnosis, adequacy of existing facilities, attainable goals, and the curriculum are reported. (JW)

Prentice, George  
**Increasing Parental Contribution To Work Adjustment for the Retarded.**  
United Assn. Retarded Children, Milwaukee, Wisconsin  
EDRS mf,hc

Descriptors: exceptional child research; mentally handicapped; vocational adjustment; vocational education; vocational rehabilitation; parent participation; motivation techniques; parent education; adolescents; educable mentally handicapped; family influence; job placement; lower class parents; parent counseling; sheltered workshops; work attitudes; young adults

This project was designed to increase parent participation in the vocational rehabilitation of adolescent and young adult mentally handicapped persons, to develop methods of motivating parents to participate, and to investigate the relationship between parent participation and the retardate's vocational adjustment. During the first year, experimental and control groups of 78 parents each were selected and randomly assigned to subgroups based on the vocational placement of their children. An educational program of group lectures and discussions was provided for the experimental group. Because of poor attendance by parents during the first year, methods of motivating parents to participate in the program were studied. The second year, 28 sets of lower socioeconomic status (SES) parents were randomly assigned to incentive groups receiving an educational program. In addition, Group One received a \$50 bonus, Group Two chose an incentive under \$50 in value, Group Three participated in a television drawing, and Group Four received no incentive. Group Five received neither education nor incentive. An upper SES group received the educational program but no incentive. The third year sample was composed of parents of 165 retarded young adults assigned to a parent education group, a telephone group, or a control group. Clients and families continued to receive service from agencies but the two experimental groups were given the educational program. Pre- and post-observer ratings were used to assess the workshop participants at the beginning and end of the program. Results of all three studies were inconclusive. Parent participation in the educational program remained poor all 3 years. Incentive methods tried during the second year were ineffective at increasing attendance for the majority of parents of low SES status. Parent participation and vocational adjustment was rated during the third year. Retardates whose parents were contacted six or more times by telephone gained in work adjustment ratings and those whose parents attended seven or more participation group meetings deteriorated in the ratings. Pre- and post-rating involved the use of different standards. The rating scales used in the study are included in appendixes. (VO)

**Vocational Rehabilitation for Mental-**

**ly Retarded Pupil-Clients, Final Report.**

Georgia State Office Of Vocational Rehabilitation, Atlanta  
EDRS mf,hc

Descriptors: exceptional child research; mentally handicapped; vocational rehabilitation; vocational education; educable mentally handicapped; community resources; state programs; demonstration programs; work study programs; on the job training; adolescents; personnel; job placement; vocational counseling; records (forms); secondary grades; vocational training centers; curriculum; vocational adjustment; teacher education; counseling; A. P. Jarrell Prevocational Evaluation and Training Center; Atlanta

This 5-year demonstration project provided adolescent educable mentally handicapped students a combined program of vocational rehabilitation and services and other secondary level educational and vocational training experiences. State and local vocational and educational resources were utilized. Students were referred for vocational rehabilitation at age 14. A psychological evaluation, home visit, vocational appraisal report, and a vocational training plan were made for each student. Students aged 14 to 16 were trained in on-campus jobs. Older students were placed in a work study program and were trained at jobs in the community. The number of pupil clients increased from 338 the first year of the project to 3,636 in the fifth year. Similarly, the number rehabilitated rose from one to 210. Average case cost per rehabilitant was \$247. Of people involved locally who responded to a questionnaire, 80 percent felt the combined program was effective. The length of time in the program as related to job placement was significant, but the IQ score was not a useful predictor of success in employment. On-the-job training, the work study program, and the use of vocational rehabilitation counselors were found to be effective. Thirty related studies are reviewed. Sample forms and evaluations are included. A 41-item bibliography is included. (MY)

### ABSTRACT 10114

EC 01 0114 ED 014 823

Tobias, Jack  
**Training for Independent Living, a Community Program for Severely Retarded Adults.**

Association For Help Retard. Child.,  
New York, New York  
National Inst. Of Ment. Health, Wash-  
ington, D.C.  
EDRS mf,he

Descriptors: exceptional child research;  
community programs; mentally handi-  
capped; vocational rehabilitation; train-  
able mentally handicapped; day care  
programs; custodial mentally handi-  
capped; demonstration programs; educa-  
ble mentally handicapped; adults; occu-  
pational therapy; program evaluation;  
program planning; self care skills; travel  
training

An occupational day center for mentally  
retarded adults was established to pro-  
vide community services for retarded  
persons who live at home and, although  
beyond school age, are unable to partici-  
pate in sheltered workshop activities.  
The staff included a director, a social  
worker, five instructors, a training su-  
pervisor, an office worker, and a psy-  
chologist (part-time). Over a 3-year peri-  
od, 83 clients were accepted into the  
program with about 55-60 being en-  
rolled at one time. Average age at  
admission was 21 years (few clients were  
over age 30), and IQ's ranged from 15 to  
65 with a mean IQ of 36. About 80  
percent had attended public school spe-  
cial classes. Specific training included  
travel training, grooming and self care,  
orientation to the community, domestic  
skills, and remunerative work. Simple  
academic instruction included reading  
signs, telling time, and using money.  
Statistical tests with data from the  
clients produced these findings. There  
was a significant relationship (.01 level  
using T test) between intelligence and  
the ability to benefit from travel instruc-  
tion. There was a significant relationship  
(.001 and .05 levels for various IQ  
groups using tests) between intelligence  
test score and the number of work units  
produced per hour. Mongoloid clients  
were significantly less productive (.05  
level using test) in a continued work  
activity than their intellectual peers in  
other etiologic groups. The San Francis-  
co Social Competency scores of clients  
are presented. Sample evaluations of  
trainees and sample case studies are  
included. Descriptions of the daily pro-  
gram and relationships with parents,  
professional groups, and the public are  
given. (J7)

**An Opportunity for Dignity through  
Work, an Occupational Training Cen-  
ter for the Mentally Handicapped.  
Final Project Report.**  
J.J. Joseph P. Kennedy Sch. For Except.  
Child., Palos Park, Illinois  
Vocational Rehab. Admin., Washington,  
D. C.  
EDRS mf,he

Descriptors: exceptional child research;  
administration; mentally handicapped;  
vocational education; vocational reha-

bilitation; sheltered workshops; job  
training; job placement; personnel; com-  
munity resources; admission (school);  
work study programs; young adults;  
counseling; responsibility; program ad-  
ministration; educable mentally handi-  
capped; Chicago; Kennedy Job Training  
Center; Palos Park

To meet the needs of young mentally  
retarded adults for vocational services,  
the Kennedy Job Training Center was  
established at the day and residential  
Kennedy School for Exceptional Child-  
ren. The project was designed to prepare  
mentally handicapped persons for work  
in the community and to utilize and  
strengthen community resources. A shel-  
tered workshop program including  
counseling and job placement services  
was established. The workshop served  
Kennedy School students, trainees from  
the Illinois Division of Vocational Re-  
habilitation, local high school special  
education students, and long term train-  
ees. Accepted persons were involved in a  
diagnostic period, then a training peri-  
od, and finally the job placement pro-  
cess. Trainees worked on subcontract  
jobs, a candle manufacturing project,  
and tasks connected with the Kennedy  
School. Included were relevant data and  
discussion on problems of establishing  
and operating a sheltered workshop,  
such as recruitment and responsibilities  
of staff and trainees, acquisition and  
completion of work orders, counseling  
and placement of trainees, and develop-  
ment of a pay scale for trainees. Results  
of the project were interpreted, and the  
need for additional services was out-  
lined. An appendix included samples of  
four forms and records used at the  
center. (MY)

#### ABSTRACT 10177

Publ. Date 66 87p.  
Jenes, Philip R.  
**The Relationship of Vocational Out-  
look and Special Educational Pro-  
grams for Adolescent Educable Men-  
tally Handicapped.**  
Illinois Univ., Urbana  
EDRS mf,he

Descriptors: exceptional child research;  
mentally handicapped; vocational ad-  
justment; program planning; vocational  
education; educable mentally handi-  
capped; prevocational education; work  
attitudes; attitude tests; program evalua-  
tion; teachers; state programs; work ex-  
perience; fathers; educational back-  
ground; employment level; sex differ-  
ences; racial differences; age differences;  
intelligence differences; work study pro-  
grams; aspiration; attitudes; socioeco-  
nomic influences; family life; reading  
level; adolescents

The purpose of the study was to investi-  
gate the relationship between the voca-  
tional outlook of high school educable  
mentally handicapped (EMH) students  
and the type of high school program in  
which they were enrolled. Possible rela-

tionships between EMH students voca-  
tional outlook and age, sex, race, intel-  
lectual level, reading achievement level,  
work experience history, and home  
background were also considered. Data  
were collected from 13 high schools in  
Illinois which operated two or more  
special classes during the 1965-66 school  
year. The sample included 202 males  
and 171 females who ranged in age from  
13 to 21 years. Vocational outlook of  
EMH students was measured by a Could  
You Ever Scale, a group test constructed  
for the study. Each program was rated  
on a program criteria index, also con-  
structed by the investigator. The study  
found (1) a significant difference in IQ  
groupings between males and females  
with more males in the higher IQ group-  
ings, (2) no significant relationship be-  
tween students vocational outlook and  
the nature of the program in which they  
were enrolled, (3) females less appropri-  
ate in their vocational outlook than  
males, (4) a decrease with age in inap-  
propriate responses on vocational out-  
look, (5) as a group non-white subjects  
were more inappropriate in vocational  
outlook than white, (6) a less appropri-  
ate outlook in the lower IQ group of  
subjects, (7) more appropriate attitudes  
in vocational outlook of males following  
community work placement, and (8)  
more appropriate vocational attitudes in  
students from the fathers higher level of  
occupational and educational groups  
than in those from the fathers lower  
level groups. Implications for program  
planning are made, and further studies  
are suggested. A bibliography contains  
32 references, and appendixes present  
the program criteria index and the  
Could You Ever Scale. (D1)

justment; social adjustment; state pro-  
grams; job placement; employer atti-  
tudes; case studies (education); counse-  
lor evaluation; professional personnel;  
nonprofessional personnel; admission  
criteria; facilities; program descriptions

An 8-week residential evaluation and  
prevocational training program for re-  
tarded females (ages 16 to 21, IQ's 50 to  
75) at a multiple disability rehabilitation  
center in West Virginia is presented.

Purpose and facilities are described, and the project plan is outlined as to application procedure, criteria for admission, advice and consultation, facilities and equipment, and functions of the project staff. Data on the project program treatment, personal and social adjustment, evaluative criteria, utilization of volunteers and students, and views of the social worker and the medical consultant towards the program. The 171 clients of the program are described by referral sources, prevalence of secondary disabilities, geographic distribution, clinic factors, psychometric data, socioeconomic factors (family), disposition of project cases, and cost. The discussion of work placement success includes characteristics of 59 rehabilitated clients, factors related to work placement success, psychometric data, adjustment, and other data. Selected case summaries and the counselor's opinion regarding effectiveness of project services are presented. Employer attitudes toward the mentally retarded are explained in terms of scoring procedure, comparison of group responses, and personal factors related to total attitude mean score. The overview and implications concern what was learned and what is needed. Accompanying the text are two figures, 21 tables, a 45-item bibliography, and four appendixes (detailed statistical data tables, the curriculum guide, policy letters, and project forms). (JD)

#### ABSTRACT 10262

EC 01 0262 ED N.A.  
 Publ. Date 66 237p.  
 Zivan, Morton And Others  
 Youth in Trouble, a Vocational Approach, a Vocational Rehabilitation Demonstration in a Residential Treatment Center to Meet the Vocational and Community Adjustment Needs of Emotionally Disturbed Youth Adjudged To Be Juvenile Delinquents. Final Report.  
 Children's Village, Dobbs Ferry, New York  
 EDRS mf,hc

Descriptors: exceptional child research; vocational rehabilitation; adjustment (to environment); emotionally disturbed; delinquency; vocational adjustment; social adjustment; residential centers; adolescents; males; personal adjustment; psychological needs; social factors; attitudes; environmental influences; special services; counseling; work experience; evaluation; behavior change; behavior; background; testing; student characteristics; occupational guidance

The project attempted to demonstrate feasibility of a comprehensive vocational rehabilitation program encompassing residential and aftercare phases to meet the vocational and community adjustment needs of juvenile delinquents and emotionally disturbed adolescents. Attempts were made to identify the personal, attitudinal, psychological, social, and environmental factors associated with community and vocational adjustment. Selection of the subjects, aged 10

to 18, was made randomly from a list of boys judged as being appropriate for vocational treatment. In addition to an experimental group of 68 subjects who received in-care and aftercare services and a control group of 25 boys who received no services, a second experimental group received the full range of aftercare service, and a comparison group of former in-care residents was used. In-care services included assessment counseling, evaluation and testing, developmental counseling, occupational group guidance, field visiting, and work exposure. Evaluation of the effectiveness of the project was based on (1) the adequacy of the community adaptation and behavior of the experimental group and (2) the occurrence of salutary change in attitudes, perception, and understanding. Results derived from questionnaires, interviews, and psychological tests showed no statistically significant difference between the groups in community adaptation. Statistically significant relationships were found among the following personal and background characteristics of the boys and their community adjustment--age at time of referral, ethnic group, religion, source of family income, rate of delinquency in area of residence, living arrangements at discharge, conformity ratings, length of time in the in-care programs, impulsivity, over conformity, sense of responsibility, and an admission of behavioral problems. Implications and suggestions for future action are discussed. Tables and a 25-item bibliography are provided. Appendixes include questionnaires and tests, scoring systems and data sheets, and correlations. (TM)

#### ABSTRACT 10602

A longitudinal program of workshop-centered rehabilitation services was administered to mentally retarded adolescents. Results with the 36 remaining at the end of 3rd year indicated that most characteristics central to vocational development were stable by early adolescence; a competence cluster of variables covaried systematically; high and low employability groups differed on most basic status variables; and the Purdue Pegboard was the best single predictor of employability. However, neither the control and experimental groups nor the attrition group and the remaining 36 differed significantly. Two employability groups were determined by production and ratings: the high group, composed of lower class Negroes, ranked higher than the low group of middle class whites, on work behavior ratings and IQ levels. The magnitude of the level of aspiration ratios tended to correlate negatively with the employability index and the competence cluster; self concept variables correlated positively for employability for Negroes and negatively for whites. The followup of 33 subjects in the 5th year indicated that when the relationship between rated employability and actual adjustment was calculated, the resulting prediction was significant ( $p$  less than .03). CRP-S-115

Descriptors: exceptional child research; mentally handicapped; vocational rehabilitation; cooperative programs; rehabilitation programs; questionnaires; secondary education; teachers; counselors; professional education

The study evaluated the cooperative effort between secondary schools with programs for the mentally retarded (MR) and the regional offices of the Division of Vocational Rehabilitation (DVR). Of the 507 questionnaires mailed to district superintendents, teachers of the MR's, regional offices of DVR, and counselors, 86.8% were returned. Analysis of data was conducted under three major groupings: school districts

with secondary programs for the MR, teachers for the MR functioning in these programs, and vocational rehabilitation counselors. The findings indicated that only 30% of the responding districts had made referrals to DVR within the year. Teachers were found to have little exposure to the services of DVR, although counselors agreed that DVR should serve the mentally retarded. It was suggested that more information about the mentally retarded and their school programs should be included in the professional training of rehabilitation counselors. (RS)

The purpose of this study was to compare the postschool adjustment of educable mentally retarded students having off campus work experience with a contrast group without school sponsored placement and supervision on jobs in the community. The major hypothesis in the investigation was that among educable mentally retarded youths who are enrolled in special classes at the senior high level, those who are engaged in off campus work under supervision of the school will make better community adjustments as adults, than will similar youths who are not engaged in off campus work. Personal interviews were conducted with 68 former students, 2 to 4 years after they had terminated their high school careers. These adults were then rated by several persons as to the adequacy of their adult adjustment. Major findings were as follows: approximately 85% of both groups were gainfully employed, the group without off campus work experience was achieving as well as the group who had received off campus work placement and supervision, and the unemployed in both groups tended to be those who were multiply handicapped or tested near the bottom of the IQ range of the group. Descriptors: exceptional child research; emotionally disturbed; physically handicapped; state programs; vocational rehabilitation; counseling; interdisciplinary approach; preventive measures; psychological evaluation; medical evaluation; college preparation; day care programs; sheltered workshops; parent counseling; program evaluation; case records; camping; counselor role; participant characteristics; program costs; Rhode Island

To provide preventive treatment, counselors from the Division of Vocational Rehabilitation (DVR) worked through a school project to serve adolescents with disabilities which might make job adjustment difficult. During the 5-year project, over 5,000 adolescents were referred, 1,800 or 40% of whom were in the school project; more than 1,000 or 55% were accepted for treatment, and the other 45% were being processed. Compared to clients in the traditional program, clients in the school project were younger, with about half 14 and 15 years old. All received diagnostic services. The most frequent disability was found to be emotional disturbance; the next most frequent were orthopedic impairments and mental retardation. Special treatment facilities offered included a college program, a day care program at a private mental hospital, community workshops for retarded clients, a group therapy program for emotionally disturbed clients and their parents, and a camp for emotionally disturbed clients. Interviews evaluating the project indicated that the DVR counselor played the crucial role in its functioning; ratings of the counselors indicated that the DVR counselor's relationship with the school guidance counselor was important. Of a sample of 91 active clients, most had been referred at age 14 or 15 for psychological problems. Of nearly 2,300 cases closed during the project, only about half were employed and half were closed after referral. (JD)

Information on vocational education for the handicapped considers the following: different types of handicaps; cooperation and interagency involvement; services available from vocational rehabilitation; a model for a state-wide cooperative agreement; programs and services; and provision of services in rural areas. Community involvement in vocational education services for the handicapped is discussed as are considerations in planning vocational education for the hearing impaired, for the visually handicapped, and for the physically handicapped. Personnel preparation, utilization, and interactions are also discussed. Regional instructional materials centers and agencies and organizations in the field of the handicapped are listed; the Vocational Education Amendments of 1968 and references are included. (RJ)

A 4-year demonstration project at Indianapolis Goodwill Industries applied work adjustment knowledge, methods, and techniques to assist 200 clients, ages 17 to 58 years, mean IQ 90, who were severely disabled with handicaps including mental retardation, epilepsy, emotional disturbances, and/or physical handicaps. After a diagnostic evaluation clients were assigned to a job; supervisors, caseworkers, and psychologists provided support or criticism directed toward shaping work attitudes and helping the person see himself realistically. Evaluation techniques considered interpersonal relations; utilization of ability, work satisfaction, adjustment to work pressure, and self concept as a worker. Supervisors and other staff members also rated workers for employability and placeability; followup studies were done. Of the 159 clients who completed the program, 129 were placed on jobs. Conclusions were that techniques used in the project were practical and effective for the majority of clients and that clients tended to show better adjustment. Administrative problems, the role of supervisors, and implications for the future are discussed; six case histories, 29 tables of information about clients, and 11 forms and rating scales are included. mentally handicapped; vocational rehabilitation; teacher role; vocational counseling; parent counseling; job placement; employer attitudes; food service occupations; custodian training; health occupations; child care occupations; money management; vocational adjustment; Dayton, Ohio

A work experience program for educable mentally handicapped youth in special classes included 215 students, 138 of them in 11th grade (105 boys, 33 girls) and 77 in 12th grade (47 boys, 30 girls). Their mean chronological age was 18-6 years and their mean IQ was 73 with a range of 52 to 82. The program coordinator of the Ohio State Department of Special Education developed the work study program; coordinated it with the Bureau of Vocational Rehabilitation, the Citizens' Advisory Committee, and the Technical Advisory Committee; obtained job placement; and shared supervisory responsibilities with the teacher-counselors, who were assigned to participating schools. Of the unskilled job placements obtained, 50% were in food service areas and 30% in porter or custodial areas. Hospital placements were also recommended; service stations and domestic homes were not. The gross annual earnings of students were \$118,000. Success was related to on the job supervision, and the teacher-counselor's interview with each student on pay day was important. In a followup study of 73 graduates of the special classes, 89% of the 44 who had participated in the program were working while only 35% of the 29 who had not participated were working. (SN)

Descriptors: exceptional child research; physically handicapped; vocational adjustment; vocational rehabilitation; medical services; special services; group counseling; occupational surveys; job placement; orthopedically handicapped; demonstration projects; employment services; counseling services; employment experience; adults; statistical surveys; quadriplegia

To help quadriplegics and other severely disabled achieve vocational placement and confront the catastrophic impact of quadriplegia on bodily function (as detailed in the report), a rehabilitation team provided medical, various special, and vocational rehabilitation services. The 100 clients (59% men, 79% less than 45 years and 62% between 20 and

39) were evaluated for physical capacities and job-task performance. Of the 100, 62 received and completed intensive training services, including vocational adjustment training, psychosocial services, and group counseling. Various job placement and promotion techniques were utilized. Of these 62, 25 were quadriplegics, 23 of whom were placed in gainful employment. Of the remaining 37 who had various degrees of severe disability, 30 were placed. Also part of the project was a mail survey made to determine the current employment experience of the quadriplegic. Of 355 persons contacted, 177 responded, of whom 69 were employed and 18 were attending college. Further descriptive data, six case studies, four recommendations, and 12 references are included. (JD)

Work-Citizenship Preparation Services for Mentally Retarded Adults. Goodwill Industries, Kansas City, Missouri  
Vocational Rehabilitation Administration (DHEW), Washington, D. C.; Missouri Section For Vocational Rehabilitation, Jefferson City; Kansas Vocational Rehabilitation Service, Topeka  
EDRS mf,he

Descriptors: exceptional child research; vocational rehabilitation; mentally handicapped; attitudes; administration; staff role; self concept; clinical diagnosis; work experience programs; adjustment (to environment); task analysis; group living; self care skills; on the job training; job skills; job placement; citizenship; family life education; educable mentally handicapped

An experimental vocational rehabilitation program for the mentally retarded (mean IQ 65.8, mean level of academic achievement 3rd grade) was conducted by Goodwill Industries from December 1958 to November 1962. Of 371 clients who were evaluated for occupational, academic, and vocational abilities, 337 completed the full diagnostic phase of the program. Clients lived at home or in a boarding home; in addition to job skills they were trained in family living, personal hygiene, conduct, citizenship, and work attitudes. Jobs were broken into separate tasks; clients received tryouts in from three to seven work areas and were evaluated in each. A number of trainees received on the job training at other agencies. Ninety-six or 28.5% of the trainees were dropped from the program primarily because of behavioral disturbances that could not be resolved in the scope of the program. Of those who completed evaluation, 33 were placed in competitive jobs, three were recommended for further diagnosis, 26 for training in trade schools, and 179 for training in Goodwill Industries. Results indicate that the mentally re-

tarded can successfully be trained to be employable and to live satisfactorily in the community; additional programs are needed to prevent or alleviate behavior problems which prevent otherwise capable persons from getting and holding jobs. (RP)

The work experience program of the Department of Vocational Rehabilitation, which provides vocational, educational, and social experiences for mentally handicapped adolescents while they are still in the school setting, is described. Information is given on the Department's responsibilities, on methods used to bridge the gap between the student's school experiences and gainful work experiences, and on ways to assist in the evaluation of the student's potential and to bring ancillary services to the student which schools cannot provide. Program funding, administrative structure, guidelines for implementing the program, and descriptions of the in-school work experience program, the physically disabled program, and the junior high program are outlined. An appendix provides samples of a proposed budget, office supply list, group counseling topics, and other information on program provisions. (WV)

Descriptors: exceptional child research; mentally handicapped; discrimination learning; vocational rehabilitation; task performance; trainable mentally handi-

capped; sheltered workshops; learning characteristics; transfer of training; multisensory learning; educational methods; intermode differences

Sixty-four moderately and severely retarded individuals enrolled in four sheltered workshops learned to assemble a 15 piece and a 24 piece bicycle brake. Training procedures utilized information obtained from the basic psychological research on discrimination learning. One-half of the subjects worked with the parts of the training task brake as they came from the factory (Form Only). The others worked with parts that were color coded (Color Form). Coding consisted of painting that surface of each part that is facing the subject when it is placed in the proper position for assembly. All groups worked with the parts of the transfer task brake as they came from the factory (Form Only). Half of the subjects learned the tasks to a criterion of six correct out of eight consecutive trials, the other half performed 20 trials beyond criterion on the training task brake (overlearning). The Color Form groups learned the training task brake significantly faster than the Form Only groups. No significant overlearning effect was found. (Author)

Descriptors: exceptional child services; handicapped; vocational rehabilitation; rehabilitation programs; evaluation; rehabilitation counseling; vocational adjustment; motivation; professional personnel; legislation; productive living; sociocultural patterns; socioeconomic influences; counseling theories; standards; social attitudes

A collection of writings by various contributors discusses the following areas: past and present concerns involving the current scene in vocational rehabilitation, historical background, and legislative contributions; philosophical concerns of the meaning of work, the development of vocational potential, and psychosocial aspects of disability; and the vocational rehabilitation process including referral, evaluation, treatment, training, job placement, followup procedures, and the role of research. The area of counseling is examined in terms of the implication of personality theory, general theories of counseling, and selected techniques, followed by a description of professional concepts and the status of the profession. Discussion questions following each chapter and an 188-item bibliography are included. (LE)

 EDRS mf,he  
 RD-829

Descriptors: exceptional child research; educable mentally handicapped; emotionally disturbed; individual characteristics; longitudinal studies; physically handicapped; prevocational education; questionnaires; socioeconomic status; urban youth; vocational development; vocational rehabilitation

This study was designed to test the belief that severely handicapped children are comparatively unready to utilize vocational services at the time they leave school, because, in comparison with normal children, they have not been exposed to a variety of prevocational work experience in their formative years. The study sample comprised approximately 280 handicapped children ranging in age from 14 to 17. The children were subdivided into three disability groupings: the physically disabled, the educable mentally retarded, and the emotionally disturbed. It was found that the physically disabled children evidenced more benefit from the services than did the other two groupings. The mentally retarded showed gains in socialization but not in employability, and the emotionally disturbed children did not show any significant benefits. It is believed that prevocational services will be more effective if they are provided within the school system itself. A related document is ED 015 314. (CH)

Descriptors: exceptional child services; adjustment problems; disadvantaged youth; employment opportunities; employment services; handicapped children; low achievers; occupational therapy; potential dropouts; vocational adjustment; vocational counseling; youth employment; vocational rehabilitation.

Some 276 handicapped and socially disadvantaged youth aged 16 to 18, who were likely to drop out of high school, received rehabilitation services from the

Philadelphia Jewish Employment and Vocational Service (JEVS) and the Board of Education. The services included intense vocational and personal evaluation, work adjustment training, individual and group counseling, remediation, social services, job placement, follow-up, and special instructions in academic subjects. In addition to the services rendered by JEVS, and effort was made to identify the intellectual, personality, and cultural factors inhibiting adjustment to on-going school instructional programs, so that emphasis might be placed on helping the disadvantaged handicapped youth successfully accommodate to, and succeed in, school or job. Some 122 (69.1%) of the 276 youth were rehabilitated and helped to make a better adjustment in school, or get and hold jobs in the competitive labor market. (B1)

 Rehabilitation Services Administration (DHEW), Washington, D. C.  
 EDRS mf,he

Descriptors: exceptional child research; mentally handicapped; demonstration projects; educable mentally handicapped; on the job training; program descriptions; records (forms); vocational education; work study programs

School training and vocational services were combined into a program designed to demonstrate that educable mentally retarded students could develop well rounded working habits that would mutually benefit them and the community. On-the-job training was used as a demonstration of the practical use of academic, social, and vocational skills learned in the classroom. Classroom work was individualized to the work experience of the student in order to develop skills and attitudes necessary for a successful employment, good citizenship, and worthwhile use of leisure time. Work experience programs 1 to 2 hours of each school day were provided within the public school setting for students below the age of 16. Upon reaching the age of 16 students were placed in the community and worked from 3 to 4 hours per day. Findings indicate that the IQ score by itself was inadequate as an indicator of job capabilities. The performance area of the psychological examination proved to be more reliable in this respect than did the verbal area in the overall IQ score. During the 3-years of operation, job placement was accomplished for 12, 18, and 19 students respectively. Information on types of occupations and project dropouts is appended. (CH)

Intended for both school and nonschool personnel, the text treats work study programming for educable mentally handicapped students at the secondary level. Information is provided concerning the structure and objectives of work study programs as well as the required competencies and responsibilities of the teacher-coordinator. Guidelines are included for setting up a new program, for organizing the classroom for program instruction, and for developing a record system, a school-public information plan, and a system to interview prospective employers. Program operation is defined in terms of legal requirements, employment limitations, and time allocation for the teacher-coordinator's duties. Further guidelines for conducting the program specify means of maintaining effective relations and suggestions for the substitute teacher. Reports and forms are listed and samples of them are appended. (J1)

 tion; withdrawal; educational back-  
 ground; social maturity; individual char-  
 acteristics; family characteristics; social  
 class; student placement; racial differ-  
 ences; parent attitudes

Vocational adjustment was studied by  
 interviewing 549 educable mentally  
 handicapped boys who had been in  
 special classes and 90% of the parents.  
 Findings were that most appeared to  
 have good vocational adjustment and  
 were not readily distinguishable in so-  
 cial or vocational adjustment from oth-  
 ers of the same age and social back-  
 ground. However, poorer adjustment  
 was noted in subjects who had been in  
 special classes longer, who had used  
 postschool training facilities, or who  
 used formal resources in job hunting  
 rather than informal resources. Social  
 class was found to be a factor, with  
 subjects from families of higher class  
 manifesting lower adjustment and great-  
 er tendencies to stay in school after age  
 16, to secure postschool training, and  
 not to be expected by their parents to  
 hold full time employment. (JD)

 ployment opportunities; employment  
 practices; job development; vocational  
 education; industry; employer attitudes;  
 employment potential; employment  
 services

Workers in various areas conferred to  
 analyze possibilities for employment  
 competition by the deaf in this technol-  
 ogically advanced age. Included were  
 leaders from industry, organized labor,  
 vocational rehabilitation, placement

services, and education. The first group  
 of papers defined employment practices  
 and trends, and their implications for  
 the deaf, related these to three specific  
 industries (aerospace, electronics manu-  
 facturing, and newspaper publishing),  
 and followed with a reaction by a mem-  
 ber of the deaf community. A second  
 group of papers explored preparation of  
 the deaf for employment, covering gen-  
 eral employer-employee relations, as  
 well as the role of the school, responsi-  
 bilities of interviewers, and vocational  
 guidance. A final series of papers dealt  
 with career development for the deaf, as  
 related to technological changes, tech-  
 niques of job and career review, and  
 placement. Discussion groups listed rec-  
 ommendations for changes in organiza-  
 tion and orientation, research, and train-  
 ing for the deaf and those working with  
 the employment of the deaf. (JB)

Descriptors: exceptional child research;  
 handicapped; instructional films; job  
 training; adults; audiovisual instruction;  
 vocational rehabilitation; evaluation  
 methods; repetitive film showings; eval-  
 uation; young adults

To determine if short concept films  
 (SCF) are effective tools for assessing  
 the potential of handicapped students  
 for training and work, 135 students at a  
 rehabilitation center were studied. In-  
 structions for how to perform two jobs  
 in jewelry engraving were given verbally  
 by an evaluator, by a color-sound film, a  
 color no-sound film, and by black and  
 white sound and no-sound films. The  
 five treatments were alternated weekly  
 until a total of 27 students were exposed  
 to each treatment. Results revealed the  
 following: the SCF had little effect on  
 the total time students spent on the job  
 sample; instructional time was reduced  
 by as much as two thirds when films  
 were used; more instructional time was  
 spent with students when they used the  
 no-sound films; black and white no-  
 sound films required the greatest num-  
 ber of repeated instructions; and color-  
 sound films were judged most effective  
 of the films. (Author/RJ)

 tion; mentally handicapped; educable  
 mentally handicapped; vocational edu-  
 cation; work study programs; self con-  
 cept; secondary education; program de-  
 scriptions; vocational aptitude; student  
 evaluation

The implementation of a work-study  
 program in a rural, depressed area, the  
 operation of the program, and evalua-  
 tion are discussed in the first of six  
 papers on vocational education for the  
 retarded. The sheltered workshop at the  
 Kurtz Training Center in Pennsylvania  
 is described with a focus on promoting  
 self image and adjustment. A 6-year  
 secondary program for students with  
 IQ's of 80 and below, located in a  
 self-contained highschool, is considered.  
 Also examined are two aspects of work  
 aptitudes and prevocational evaluation  
 in work-study programs. (RJ)

Descriptors: exceptional child research;  
 vocational education; physically handi-  
 capped; mentally handicapped; emotion-  
 ally disturbed; educable mentally handi-  
 capped; prevocational education; work  
 experience programs; case records; vo-  
 cational adjustment; employment poten-  
 tial; family relationship; cooperative  
 programs; followup studies

To determine the effect of prevocational  
 work experience on the severely handi-  
 capped, 280 children, aged 14 to 17,  
 were studied. The children were subdivi-  
 ded into three disability groupings  
 (physically disabled, educable mentally  
 retarded, and emotionally disturbed),  
 each of which was further divided into  
 experimental (E's) and comparisons  
 (C's). The E's received vocational serv-  
 ice from three private agencies with  
 workshops 2 days per week during 2  
 school years. All children were assessed  
 at the start and end of the program and  
 followed up 12 months later. Results  
 indicated that the disability groupings  
 differed markedly in demographic and  
 personal characteristics, in the nature of  
 presenting problems, in their school ca-

reers, and in outcomes. The physically disabled benefited most from the services with the E's having higher potential for employment than the C's; the mentally retarded gained in socialization and interpersonal adjustment, but not necessarily in employability; and the emotionally disturbed did not benefit significantly from the services, except the E's remained in school substantially longer than the C's. Additional findings were that ethnic and socioeconomic status were important determiners of both progress and outcome; the services were least effective with children in the poverty subculture.  The Efficiency of a Prevocational Curriculum and Services Designed to Rehabilitate Slow Learners Who Are School Dropout, Delinquency, and Unemployment Prone. Final Report. Champaign Community Unit IV Schools, Illinois  
 EDRS mf,lc  
 VRA-RD-1075

Descriptors: exceptional child research; mentally handicapped; slow learners; prevocational education; student rehabilitation; disadvantaged youth; vocational counseling; vocational adjustment; dropout prevention; delinquency prevention; work study programs

It was hypothesized that 91 slow learners from low socioeconomic status homes, in a carefully designed two-year vocationally oriented educational program with prevocational counseling, would show achievement superior to that of a matched control group enrolled in a regular educational program. Data were collected from school records, interviews, case studies, psychological tests, and Division of Vocational Rehabilitation records. The experimental subjects had significantly better attendance, fewer school dropouts, and made a better vocational adjustment than the control group. There was no significant difference between the two groups in social and emotional adjustment. Achievement test scores for the tool subjects of arithmetic, reading, and spelling showed no significant differences between the two groups in amount gained. Some implications for program implementation were that specially trained administrative and teaching personnel should be employed for this kind of program, the ratio of teacher to youth should be no greater than one to 20, and the curriculum should be functional, individualized, and vocationally oriented. A review of related literature, a complete program description, and recommendations for further research and programing are included. (ET)

Vocational Training

Materials for Secondary School Programs for the Educable Mentally Retarded Adolescent.  
 New England Materials Instruction Center, Boston, Massachusetts  
 Boston University, Massachusetts,  
 School Of Education  
 EDRS mf,lc

Descriptors: exceptional child education; mentally handicapped; work study programs; instructional materials; bibliographies; educable mentally handicapped; adolescents; resource materials; curriculum guides; audiovisual aids

Compiled are materials related to work study programs for the educable mentally handicapped adolescent. Items listed include professional books, textbooks, resource aids, journals and articles, curriculum guides, instructional materials, and audiovisual aids. The materials are grouped according to academic areas (mathematics, science, social studies, English, reading), vocational education (general, industrial arts, home economics, jobs, trades), and social skills (general, safety, driving, recreation, home care, health, social adjustment). Also included are sections on supplementary audiovisual materials, tests, and professional books. Some materials are briefly annotated; detailed descriptions of the others are available from the retrieval filing system at New England Materials Instruction Center. (KW)

 Vocational Readiness for Young Disabled Students in New York City: Final Report of a 5-Year Collaborative Study.  
 State University Of New York, Albany,  
 State Education Department  
 Rehabilitation Services Administration (DHEW), Washington, D. C.  
 EDRS mf,lc

Descriptors: exceptional child research; vocational education; prevocational education; vocational rehabilitation; employment potential; physically handicapped; educable mentally handicapped; emotionally disturbed; adolescents

To determine if severely handicapped children were in fact not ready to utilize vocational services when they leave school (due to lack of prevocational work experience), handicapped children were provided two years of vocational counseling and sheltered work experience. The sample of 280 children (ages 14 to 17 years), were divided into experimental (Es) and control (Cs) groups in each disability grouping (physically handicapped, educable mentally handicapped, and emotionally disturbed). The Es received vocational service two days a week for two years. All children were assessed before and after the program and 12 months later. Results showed that the physically handicapped Es had higher potential for service than the physically handicapped Cs. The physi-

cally handicapped benefited the most from the program. The mentally handicapped showed gains in socialization and interpersonal adjustment, though not much gain in employability. The emotionally disturbed showed no significant benefits. Ethnic and socioeconomic factors were important determiners of progress (the prevocational service was least effective with children facing problems of the poverty subculture), and more integration with the child's educational program is recommended. Appendixes include forms, case histories, many tables, and additional information. (KW)

Descriptors: multiply handicapped; deaf blind; rehabilitation programs; demonstration projects; community attitudes; special services; community services; research projects; evaluation techniques; adults; vocational rehabilitation; Anne Sullivan Macy Service for Deaf-Blind Persons

Described is the Anne Sullivan Macy Service for Deaf-Blind Persons, a regional demonstration and research project conducted by the Industrial Home for the Blind in New York and the Social and Rehabilitation Service (DHEW). The purposes of the project are noted to be rehabilitation services to the deaf-blind, mobilization of state and local community resources to initiate referrals for rehabilitation and to provide services following rehabilitation, development of affirmative attitudes by the public toward deaf-blindness, and data collection, research studies, and dissemination of findings. The report describes the deaf-blind, the dimensions of the problem, the rehabilitation program organized, and the approach to cultivating public and professional concern. The salient features of the client group of 171 deaf-blind persons are described, as are the measuring procedures used (observational comparison and followup survey), and the findings of these studies. Recommendations for improving services in the future are made. Appendixes include the schedule of evaluation procedures, characteristics at intake of the clients, changes resulting from rehabilitation in a sample of 50 clients, changes in agency attitudes, a list of publications related to the project, guidelines for volunteers, and descriptions of manual alphabets. Descriptors: exceptional child research; aurally handicapped; post secondary education; program evaluation; program administration; deaf; junior colleges; technical institutes; vocational education; administrator guides; Delgado College (New Orleans)

A 5-year project is planned to increase opportunities for the deaf by using existing vocational and technical schools and junior colleges customarily serving the hearing. Its pilot planning phase developed guidelines for program establishment and administration and a research plan for program evaluation and improvement. Preparatory meetings and site visits were made to the three schools involved. A list is provided of tests to be used; guidelines, comprising around a fourth of the document, are given for the program at Delgado College in New Orleans. Also included are 1-page descriptions for the programs at Seattle Community College and St. Paul Technical Vocational Institute. Appended forms make up about half of the document. (JD)

 New York University Press, Washington Square, New York, New York 10003 (\$7.95).

Descriptors: exceptional child services; vocational rehabilitation; legislation; work attitudes; vocational aptitude; social psychology; handicapped; job placement; research utilization; personality theories; counselor role

Based upon a lecture series on vocational rehabilitation conducted by several universities, the text includes presentations on the current scene, historical background, and legislative contributions by Salvatore DiMichael, James Garrett, and Mary Switzer respectively. Anne Roe discusses the meaning of work, Donald Super treats development of vocational potential, and Beatrice A. Wright describes psychosocial aspects of disability. Referral, evaluation, and treatment are considered by John McGowan; training, job placement, and followup are discussed by Daniel Sinick; the research role is treated by Herbert

Rusalem. Also included are implications of personality theory for counseling by Milton Schwebel, theories of counseling by Cecil Patterson, selected techniques of counseling by Lloyd Lofquist, professional concepts by Frederick Whitehouse, and the status of the profession by John Muthard. Discussion questions are included. (MS)

 Proceedings Of The Vocational Rehabilitation Subdivision Meetings Held At The American Association On Mental Deficiency Conference (San Francisco, California, May 12-17, 1969).

Descriptors: exceptional child education; mentally handicapped; vocational rehabilitation; innovation; conference reports; manpower development; vocational training centers; potential dropouts; cooperative programs; food service; attendant training; program training

Conference proceedings of the Vocational Rehabilitation Subdivision Meetings held at the American Association on Mental Deficiency contain discussions of innovative aspects of vocational rehabilitation and mental retardation. In the area of training rehabilitation counselors, George Barloff describes the Mental Retardation Training Institute in North Carolina and Jack Van Vliet examines the use of the rehabilitation counselor intern with potential high school dropouts. An overview of cooperative educational programs and approaches for vocational training of the retarded is provided by Harold Shay. Eduardo Hinojosa examines food service training in an institutional setting, and Jacob and Irma Jaffe suggest traditional and innovative methods of manpower development. An experimental approach called Project Workout which trains the mildly retarded to be institutional attendants is described by Kathleen Orr and Harvey Snyder. (RD)

 Curative Workshop Of Milwaukee, 750 North 18th Street, Milwaukee, Wisconsin 53233 (\$2.00).

Descriptors: exceptional child research; trainable mentally handicapped; domestic; pilot projects; vocational education;

project training methods; job skills; maids; job training; work experience programs; homemaking skills; females

A pilot project of the Curative Workshop of Milwaukee which provided domestic work training for four trainable mentally retarded girls is described. School psychologists' reports of the four adolescent trainees are included, and recommendations for future programming are noted. Evaluation data reflect the girls' performance, amount of supervision, job satisfaction, relationship to employer and supervisor, motivation, and interpersonal competence. Almost half of the report consists of a selected annotated bibliography and a list of references relating to the education, training and placement of the mentally retarded. The appendixes present household job task descriptions, safety skills check lists, related inventories of visual and auditory skills, and the project evaluation form. (RD)

The demonstration project involving the Cooperative School-Rehabilitation Centers (CSRC) for trainable mentally handicapped adolescents is described in areas of background, local planning, the planning grant, and beginning activities. Administrative concerns of staffing, program focus, responsibility structure, and negotiations for expansion are noted. The students' characteristics are presented, and brief descriptions of program areas including academics, arts and crafts, home economics, independent living, job training, music, physical education, and social perceptual training are provided. Followup data examines adjustments in employment and community integration. Also described are the role of the case manager, program innovations, program support activities, steps to employment, and the implications for the future of the Cooperative School-Rehabilitation Centers. **Skill Analysis as a Technique for Predicting Vocational Success of the Mentally Retarded.**  
Human Resources Center, Albertson, New York  
Insurance Company Of North America, Albertson, New York;  
Social And Rehabilitation Service (DHEW), Washington, D. C., Research And Demonstration Grants  
EDRS mf,hc

Descriptors: mentally handicapped; educable mentally handicapped; vocational aptitude; predictive ability (testing); employment potential; predictive measurement; job skills; ability tests; skill analysis

The study's purpose was to develop a Skill Analysis Test Battery to help predict vocational achievement of the educable mentally retarded (EMR) in clerical/banking and industrial/electronic assembly areas of training. Job skills for the two areas were analyzed. Skill analysis tests were developed and administered to 40 EMR clients prior to their receiving 6 weeks of training in each area. Following training, supervisors' ratings were obtained on a three-part Rating Scale developed for this study and used as the criterion measure. The relationship between the Rating Scale and the Skill Analysis Tests was analyzed to determine the predictive reliability of the skill tests. Nine skill test measures had statistically significant correlations with the criterion measures (intercorrelations ranging from .27 to .47), but the skill tests did not correlate significantly with the rating scale of general adjustment, suggesting that abilities measured by the skill tests are separable from personal-

social adjustment in the EMR client as in the normal trainee. Trainability is concluded to be a composite of skill potential and behavioral characteristics of personal-social adjustment, pointing to the need to separate the two criteria (achievement and adjustment) in selection of persons for training programs. (KW)

A Food Service Laboratory Project was initiated at a junior high school for the training, participation, and observation of educable mentally retarded (EMR) students. Thirty EMRs participated in the vocational training program, the academic portion of which was work-oriented and closely related to the work in the Food Service Laboratory. Students, after training, were placed in jobs in a school-work experience program. Community support was elicited, placement opportunities developed, and the 14-17 year old students placed in jobs, in which some limited success was noted. Included are curriculum guides developed, equipment specifications, scales and forms used. Progress was noted in in-school retention rate, basic skill subjects, and growth and maturity of students. Recommendations for further program improvement are made. (KW)

**Computer Assisted Instruction for Vocational Rehabilitation of the Mentally Retarded.**

Texas University, Austin, College Of Education  
Social And Rehabilitation Service (DHEW), Washington, D. C.  
EDRS mf,hc

**Descriptors:** exceptional child research; educable mentally handicapped; vocational rehabilitation; computer assisted instruction; mentally handicapped; program descriptions; program design; research reviews (publications)

A detailed description of the conception, development, and results of a 2 year project designed to teach the educable mentally handicapped student a set of useful, generalized skills using a computer assisted instruction (CAI) system is presented. Background information on the problem of vocational rehabilitation of the mentally handicapped, present costs, and recent research in the development of better instructional techniques are discussed. Course development, production of a CAI program, developmental testing on the system, pretest, and administration of the instructional materials are presented. Of the 21 students who completed the course, the researchers felt the majority showed an improvement in change-making skills. The CAI is felt to be effective in teaching a set of specified skills to the mentally handicapped student. A detailed example of the logic and instruction in the change-making module is included. **Vocational Rehabilitation for the Disadvantaged.**

EDRS not available  
Heath Lexington Books, 125 Spring Street, Lexington, Massachusetts 02173 (\$12.50).

Descriptors: disadvantaged groups; disadvantaged youth; vocational rehabilitation; rehabilitation programs; program evaluation; economics; program budgeting; evaluation; sociology; cost effectiveness

Contained in the volume are the results of an interdisciplinary evaluation of vocational rehabilitation for the disadvantaged. Data were gathered from 14 Research and Demonstration Projects across the United States and in Puerto Rico. The book is intended for social scientists and policy makers interested in vocational programs for the poor, and in the economics and sociology of project evaluation. The sociological evaluation, contained in the first half of the book, describes the projects, the process of selecting clients from applicants, the assessment of factors related to acceptance into the program, rehabilitation as an intervening variable, and an assessment of factors related to rehabilitation. The economic evaluation, which follows in the second half, discusses the theoretical aspects of the economics of vocational rehabilitation, presents a model for estimating costs and benefits, and also covers empirical estimates of costs and benefits for disabled public assistance clients, and comparing costs and benefits. Extensive data gathered from the projects used as data sources are appended. (KW)

**Vocational Preparation: Suggestions for Teachers of the Handicapped.**  
Iowa University, Iowa City, Special Education Curriculum Development Center  
EDRS mf, hc

Descriptors: exceptional child education; vocational education; curriculum guides; mentally handicapped; teaching guides; work attitudes; wages; job skills

Designed for use by teachers of the handicapped, the curriculum guide provides brief objectives and activities in readiness for vocational preparation at the primary level. At the intermediate-junior high level, 14 specific lessons are presented which contain objectives, teaching suggestions, activities, and materials in aspects ranging from self awareness to finding and securing a job. A starter unit of 13 lessons is diagramed to indicate objectives, activities, and resource materials in the area of wage and payment concepts. Classroom vocational preparation is outlined, and school-job training programs are described for three levels of ability. Student work sheets and a related bibliography are included. (RD)

**Education and Habilitation of Multiply Handicapped Blind Youth.**

EDRS not available  
New Outlook For The Blind; V65 N2 P56-61 Feb 1971

Descriptors: exceptional child education; multiply handicapped; rehabilitation programs; vocational adjustment; blind; vocational counseling

Vocational adjustment for multiply handicapped blind youth is considered. Based on a rehabilitation project to meet the needs of older students of a school

for the blind, three basic groups, each requiring a different constellation of services, are identified--the high school group, the transitional work experience group, and the work evaluation group. Education, counseling, and services required for each group in the project are presented and examined. The utilization of supportive services and workshops for each group is emphasized. The project was felt to point up the need for such things as an adapted curriculum to the new experiences afforded by the workshops, more available services to meet the present need, and on-going group counseling for parents. Descriptors: vocational education; educational trends; federal legislation; state programs; educational needs; vocational counseling; financial support; trend analysis; Vocational Education Amendments of 1968

The document surveys the state of vocational education in the American educational system. The involvement of the federal government in manpower training is reviewed, emphasizing the provisions of the Vocational Education Amendments of 1968 and the Voc Ed programs able to be funded under these amendments. Manpower programs currently in operation are described. Several state programs, illustrative of how Voc Ed can be integrated into all public schools at all levels, are summarized, as are other state plans for improvement in Voc Ed. Trends in the vocational curriculum, including developmental curriculums, the cluster approach, education-industry partnerships, and joint occupancy with commercial enterprises, are examined. Also discussed are the areas of vocational counseling and guidance, and of accreditation, teacher education, and certification. Some exemplary projects are listed, and statistics comparing authorizations and actual appropriations presented. (KW)

**Vocational Education-Special Education: A Curriculum Guide for Teachers of Home Economics and Educable Mentally Retarded, Grades 7-12.**

Michigan State Department Of Education, Lansing, Division Of Vocational Education  
EDRS mf, hc

Proceedings Of A Vocational Education-Special Education Institute (Lansing, Michigan, June 15-19, 1970).

Descriptors: exceptional child education; educable mentally handicapped; home economics; curriculum guides; vocational education; secondary education; self care skills; family life education; social development

Resulting from the Vocational Education-Special Education Institute (a teachers' workshop held in Lansing, Michigan, June 15-19, 1970), the curriculum guide contains the purpose, philosophy, and objectives of the Institute. The following five curriculum areas are presented in color-coded sections designed for teachers of home economics and educable mentally handicapped students: social behavior and self care skills, food instruction, clothing, family relations, and housing information. Objectives, resource materials, desired concepts and attitudes, and teaching suggestions are noted for each area. (RD)

Descriptors: exceptional child research; educable mentally handicapped; slow learners; disadvantaged youth; vocational rehabilitation; vocational counseling; vocational education; job placement; program descriptions; adolescents; senior high schools; District of Columbia

The services and effects of a 3-year project designed for a selected group of students in the low range of mental ability (and/or with subaverage intellectual functioning) enrolled in the Eastern High School (Washington, D.C.) are reported. The objects of the demonstration project were to provide for unmet academic, social, prevocational and vocational needs of handicapped students; to provide vocational rehabilitation services concurrent with educational services to enhance job placements; and to establish a mutually facilitative relationship between the Department of Vocational Rehabilitation and Public Schools. The project population consisted of 12 to 13% of the student body (age range of 16 to 21 years) from culturally disadvantaged backgrounds who were exposed to vocational counseling and guidance, training, employment, and followup counseling. During the project period (1965-1968), 784 referrals were received; of these, 330 cases were accepted for services. The cases closed as successfully rehabilitated during the project period numbered 140, representing approximately 42% of the cases accepted for services. Clerical and sales occu-

pations accounted for the job placements in about 66% of the cases. Information on project expenditures, implications, and specific recommendations are provided. (RD)

The Development of Pre-Vocational Behavior in Deaf Adolescents.  
EDRS not available  
Teachers College Press, Columbia University, 525 West 120th Street, New York, New York 10027 (\$4.25).

Descriptors: exceptional child research; aurally handicapped; prevocational education; behavior patterns; deaf; adoles-

cents; communication problems; language ability

To investigate the development of prevocational behavior in adolescents enrolled in schools for the deaf, and to determine some of the major variables related to the prevocational behavior of deaf adolescents, 240 students from four schools for the deaf were studied. Information required for the study was obtained in three ways: a personal data sheet, a parent questionnaire, and a series of testing and interviewing sessions with the subjects. Results were described indicating that at all ages deaf subjects choose jobs at lower socioeconomic levels than do their hearing siblings and tend to cluster at the semiskilled and unskilled levels. It was concluded that the vocational information and planning of deaf subjects were related to their language and communication competence, the level of stimulation at home, and to a lesser degree their intelligence and independence. Descriptors: exceptional child research; vocational education; followup studies; handicapped; aurally handicapped; visually handicapped; physically handicapped; manpower development; public education; interviews; Ohio

A followup study of aurally, visually, and physically handicapped graduates of the Cincinnati Public Schools was investigated for use in future educational planning for handicapped children. A random selection of 24 aurally handicapped, 15 visually handicapped and 34 physically handicapped graduates were interviewed. Twenty-nine of the group met the criteria of being employed with a measurable wage and employers of all 29 subjects were interviewed. Findings were indicated by the researchers to show that the majority of the handicapped pupils were capable of successful occupational adjustment to unskilled and semiskilled jobs; however, impractical school experiences were not marketable enough to provide economic stability. Recommendations were made that the administration should assume more responsibility for the occupational placement of disabled pupils; the scope of the pre-vocational training program should

Final Report of the Relationship among Disability, Education, and Vocational Achievement.

Just One Break, Inc., New York, New York  
Social and Rehabilitation Service (DHEW), Washington, D. C., Division of Research and Demonstration Grants  
EDRS mf, hc

Descriptors: handicapped; vocational adjustment; success factors; achievement; employment experience; employment level; job satisfaction

To determine the occupational experiences of poorly educated disabled persons, 389 disabled adults serviced by a New York City private employment agency between 1960 and 1967 were interviewed. Each was medically able to work full-time, though vocationally handicapped due to his disability, and had fewer than 12 years of schooling. An index of vocational achievement, constructed to measure ability to function in the work situation with maximum rewards, included measures of employment status, changes in salary, and changes in job level since placement. Results at followup showed the following factors associated with vocational achievement: sex (men more successful than women), age (young more successful), and socioeconomic status (upper class more successful). Disability factors associated with achievement were onset of disability before age 45 and having a disability free from stigma. Work-related factors were interest in skilled manual jobs, high pay, avoiding formal job-seeking since placement, no specific job requirements when seeking last job, holding skilled manual positions, lengthy on-the-job training, and need to work as indicated by number of dependents. Descriptors: exceptional child education; educable mentally handicapped; prevocational education; skill development; job skills; occupations; task analysis; teaching guides; classroom activities; mentally handicapped; vocational education

The teacher's guide is designed to accompany the VIEW for the Handicapped Program in Indiana, which provides a comprehensive and flexible curriculum of pre-vocational orientation, cross-occupational skill training, and job-specific information appropriate for use with educable mentally retarded (EMR) students at the junior and senior high school levels. The guide consists primarily of activities useful in leading EMR students to an understanding of various concepts related to pre-vocational orientation and the attaining of certain cross-occupational skills. Following the prevocational orientation section, in which classroom activities are suggested for each learning objective, specific individual skills applicable to a number of the 50 jobs covered are either task analyzed or presented in profile. For the task analyses (on cleaning, moving, and the use of tools and equipment), suggested activities are directed toward specific task training. In the General Skills Profile section, activities are directed toward the general development of each skill. Appended is information related to the viewscripts which accompany the course. (KW)

**A Demonstration to Determine the Efficacy of Providing Rehabilitation Services to the Adult Deaf in an Ongoing, Comprehensive Rehabilitation Facility for Handicapped Hearing Persons. Final Report.**

Arkansas State Board of Vocational Education, Little Rock  
Rehabilitation Services Administration (DHEW), Washington, D. C.  
EDRS mf, hc

Descriptors: exceptional child research; aurally handicapped; vocational rehabilitation; program effectiveness; program evaluation; adults; multiply handicapped; underachievers; communication problems; vocational training centers; skill development; Arkansas

To determine the effectiveness, feasibility, and desirability of providing rehabilitation services to the adult deaf in a residential facility for handicapped hearing persons, 131 deaf clients were studied during 3 years. Forty were multiply handicapped while the majority were underachievers. The program was viewed as only desirable to a degree due to a lack of specialized staff and too little individual instruction in vocational skills. During the 3 years, 57 students completed training while 46 terminated before completion; 85% of the total were judged to have made worthwhile personal, social, and vocational gains, but most did not appear to benefit to the extent of their capabilities. Services for the deaf were considered feasible for the length of the study, but questions were raised concerning permanent continuation. The deaf were often short-changed as a result of communication difficulties. Additional data and conclusions are presented. (RJ)

EDRS not available

Flame of Hope, Inc., 81 Bassett Lane, Hyannis, Massachusetts 02601.

Descriptors: mentally handicapped; sheltered workshops; marketing; business; business administration; vocational rehabilitation; demonstration projects; Flame of Hope, Inc.

The report describes the background, development, and evaluation of the

Flame of Hope project, in which over 750 mentally retarded persons in 13 different sheltered workshops produced over \$1,000,000 worth of candles and perfume, which were marketed and sold by Flame of Hope, Inc., a non-profit corporation. Results and statistical data are discussed and evaluated in relation to 32 hypotheses concerning the mentally retarded clients, characteristics and nature of the sheltered workshops, and Flame of Hope administration, operations, and activities (selling, marketing, and promotional strategies and finances). Results show that the self-sufficient operation of a central marketing organization for products made by the mentally retarded is possible; that the retarded can produce high quality merchandise, and that the sale of proprietary products can be more profitable than most sub-contracts presently available to workshops. Among other results cited is the fact that approximately 83 of the 250 retarded workers involved each year have gone on to competitive outside employment. (KW)

The report of a project for planning a training program for the mentally retarded in the areas of food preparation and service summarizes activities of the planning project and makes recommendations for possible implementation. The training program is designed for educable mentally retarded youth who would benefit from specific vocational education programs at the high school level. The need for this training program and employment projections are presented. Aspects of the training program which are discussed and for which recommendations are made include staffing needs (qualifications, sources of personnel, teacher/student ratio), student selection criteria and procedures, the training setting and equipment needed, and areas of specialization to be emphasized. Behavioral objectives and curriculum content recommendations are made, including suggested teaching units, objectives, training activities and resources, and evaluation techniques for 10 specific curriculum areas. Also covered are possible relationships with other school programs and personnel, and with rehabilitation agencies and trade organizations. A suggested budget, totaling \$44,250, for the initial year of a demonstration project for training mentally retarded students according to these plans and recommendations is included. (KW)

Easter Seal Society for Crippled Children and Adults Of Iowa, Inc., 401 N. E. 66th Avenue, Des Moines, Iowa 50313.

Descriptors: adults; physically handicapped; demonstration projects; vocational rehabilitation; homebound; sheltered workshops; grouping (instructional purposes); Iowa

A demonstration project to determine the effectiveness of training severely handicapped homebound persons in a group setting is reported. Eighty nine physically handicapped clients were accepted for training in at least one of three training sections for eight different types of training. Each client selected two crafts in which he was interested and appeared to have some measured aptitude. It was concluded that homebound persons of multi-disabilities could live, work, and learn together in a group setting. Better than 80% of the clients were noted to have developed one or more skills on a level that enabled them to make saleable products. Skill areas which were shown to be most successful for the handicapped were woodworking, sand painting, sewing, weaving, and ceramics. In followup testing an improvement in self concept was indicated. (CD)

The primary objective of the pilot project described was to offer a program of vocationally-oriented enrichment activities to educable mentally retarded (EMR) adolescents experiencing retardation in the following developmental areas: educational, mental, social, and vocational. The prevocational and social adjustment program was conducted at the Curative Workshop of Milwaukee (Wisconsin) during July and August, 1970, and enrolled a total of 11 clients, ages 16-20 years, all of whom had attended work experience training prior to the project. Detailed are objectives and activities in three major program areas: vocational, educational, and social adjustment. Six specific teaching units are summarized. Information is provided on parents' attitudes, vocational goals for their children, and evaluation of the program, as well as client and staff evaluations of the program. (KW)

Journal of Rehabilitation of the Deaf; V4 N4 P42-6 Apr 1971

Descriptors: exceptional child education; aurally handicapped; work study programs; vocational education; job placement

The article examines a student job evaluation plan used in a rehabilitation center for the deaf. Evaluation checks for perceptual motor skills, manual dexterity, and vocational interest and aptitude are described. Training and placement of the students in either a work adjustment or skill training area follow the evaluation period. Counseling sessions are conducted with the students and instructors regarding stability, maturity, work tolerance, attention span and working in groups. Various vocational training areas are mentioned, and recent results of the work study program are summarized. (CD)

Directory of Workshops in Canada Serving the Handicapped.  
EDRS not available  
Manpower Utilization Branch, Department of Manpower And Immigration, Ottawa, Ontario, Canada.

Descriptors: handicapped; directories; community services; rehabilitation centers; employment opportunities; sheltered workshops; foreign countries; Canada

Printed in English and French, the directory contains a color-coded section for each Canadian province that includes community and general workshops of rehabilitation, business enterprises employing primarily handicapped employees, programs for the mentally retarded, programs for the blind, and miscellaneous. Where applicable, each entry includes organizational name, address, manager's name, number of clients served, and nature of service. A table lists the type of rehabilitation workshops, the province totals for a number of workshops and number of clients served, and Canadian totals for number of workshops and number of clients served. A Discrete Discriminant Analysis Procedure for Vocational Rehabilitation Predictions.  
EDRS not available  
Rehabilitation Literature; V32 N8 P232-8 Aug 1971

Descriptors: handicapped; predictive measurement; vocational rehabilitation; prediction; discriminant analysis; rehabilitation; screening tests; statistical analysis

Presented and applied is a discrete multivariate classification procedure for predicting vocational rehabilitation out-

comes using several background characteristic combinations. The procedure classifies clients into outcome groups which they most resemble on several background variables and minimize the error of misclassification by utilizing cost-of-misclassification functions of several types. Cost-of-misclassification functions are discussed from a financial and humanitarian standpoint. As an example, the procedure is applied to 239 psychiatrically disabled vocational rehabilitation clients using seven dichotomized background variables and three outcome groups. A predictive validity check, using a random sample of 18 subjects, was made. Comparisons on three of the cost schedules were made to see how well the discriminant analysis predicted actual rehabilitation outcome. It was concluded that discriminant analysis of discrete data has considerable potential in rehabilitation counseling and research. (Author/KW)

**For the Disabled: Help Through Rehabilitation.**  
Rehabilitation Services Administration (DHEW), Washington, D. C.  
EDRS not available  
Rehabilitation Services Administration, 330 C Street, S. W., Washington, D. C. 20024.

Descriptors: services; handicapped; directories; state agencies; program descriptions; vocational rehabilitation

Briefly outlined are rehabilitation services available to disabled persons in the United States through the federal Rehabilitation Services Administration and state governments. Discussed are eligibility, application procedures, services for the blind, and services available through state agencies such as counseling and guidance, medical examination, medical help, physical aids, job training, expenses, other goods and services, job placement, and follow-up. The majority of the pamphlet is a listing of state rehabilitation agencies, with address and telephone number accompanying each entry. (CB)

**Handbook of Selective Placement in Federal Civil Service Employment of the Physically Handicapped, the Mentally Restored, the Mentally Retarded, and the Rehabilitated Offender.**

Civil Service Commission, Washington, D. C.

EDRS not available

Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402 (\$0.60).

Descriptors: services; physically handicapped; mentally handicapped; prisoners; employment opportunities; job placement; employment qualifications; counseling; United States Civil Service Commission

Designed to facilitate cooperation between federal government officials and rehabilitation personnel, the pamphlet discusses federal civil service employment of the physically handicapped, the mentally restored, the mentally handicapped, and the rehabilitated offender. Examined are the role of agency coordinator in helping a handicapped person find federal employment, role of rehabilitation counselor, general considerations on the physically handicapped, special considerations on the severely handicapped, the blind, the deaf, the mentally restored, the mentally handicapped, other physical handicaps, the rehabilitated offender, and work release for the offender. Applicable regulations are incorporated briefly. (CB)

**Workshops for the Handicapped in the United States: An Historical and Developmental Perspective.**  
EDRS not available  
Charles C Thomas, Publisher, 301-327 East Lawrence Avenue, Springfield, Illinois 62703 (\$16.00).

Descriptors: handicapped; sheltered workshops; rehabilitation centers; vocational rehabilitation; historical reviews; administrative organization

The history of workshops in the United States for physically, mentally, socially handicapped, or otherwise disabled or

disadvantaged persons is traced. Included in the general category of workshops under discussion are sheltered workshops, rehabilitation workshops, rehabilitation work centers, rehabilitation industries, work adjustment centers, and work training centers. The book defines the role of workshops, sets forth how they have developed to help handicapped persons solve their employment and work-related problems, describes how they function (nature, characteristics, classifications, standards and accreditation, philosophies, programs and services, organization, and administration and financing), makes suggestions for their improvement, and forecasts opportunities for future development. The scope of the discussion is limited mainly to programs using substantial paid work. Appended is a summary of standards for the operation of workshops. (KW)

**An Academic-Vocational Program for Multiply Handicapped Deaf Students.**  
EDRS not available  
Volta Review; V73 N7 P417-25 Oct 1971

Descriptors: exceptional child education; multiply handicapped; aurally handicapped; program descriptions; vocational education; program planning

Described is a combined educational-vocational program for multiply handicapped deaf children (IQ no lower than 50 and not confined to a wheelchair) at the Ontario School for the Deaf in Milton. Discussed are the planning of the program, implementation problems, staffing procedures, use of consultative personnel, referral areas, and benefits of the program. The program provides on-the-job as well as classroom experience and, when possible, pupils are integrated into the regular classes for deaf children. It is reported that since the program was initiated, there has been a noticeable improvement in both academic and vocational skills and in the behavior of the students involved. (KW)

**HOW TO ORDER**

To order ERIC REPORTS include complete information for all order form items. Please print or type all information clearly.

- Complete "bill to" and "ship to" addresses. Be sure to complete "ship to" address if different from "bill to". A like "ship to" address may be completed as "SAME". Include zip code.
- Order by printing ED number in designated space. ED accession numbers are listed in Research in Education (RIE). RIE may be purchased from: Superintendent of Documents, GPO, Washington, D.C. 20402.
- Include number of copies (1, 2, 3, etc.) to be ordered in appropriate space. Use MF space for microfiche copies, use HC space for hard copy (paper). *Check RIE for availability of document in MF and HC.*
- Include price from the rate schedule. (Refer to price schedule on back.) Prices are also published in current issues of RIE.
- Some ED numbers represent a series of titles, and will be billed by title, not ED number. A list of applicable ED numbers is available.
- Extend number of copies and price for total price for each entry.
- Add items 1 through 15 and insert amount in "Sub-Total" box.
- Add state sales tax for Illinois and Maryland or check box and cite tax exemption number for Illinois and Maryland only.
- Add "Sub-Total" and "Tax" and insert amount in "Total" box.
- Indicate payment method desired. Payment must accompany all orders of \$10.00 or less. Make all drafts payable to EDRS.
- Sign AUTHORIZATION and date order.
- Include only 15 entries per form. Complete and sign additional forms if required.
- Quality warranty. LIPCO will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of LIPCO. Best available copy will be supplied.

ERIC DOCUMENT REPRODUCTION SERVICE is operated by Leasco Information Products, Inc. for the U.S. Office of Education.

Orders are filled only from ED accession numbers. Titles are not checked. Please be sure you have supplied the correct numbers.

Each Additional 100 pages or portion thereof.	3.29

1. Book Rate or Library Rate postage is included in above prices.
2. The difference between Book Rate or Library Rate and first class or foreign postage (outside the continental United States) rate will be billed at cost.

## TERMS AND CONDITIONS

### 1. PRICE LIST

The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

### 2. PAYMENT

The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

### 3. REPRODUCTION

Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

### 4. CONTINGENCIES

LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due

to erroneous or incomplete information furnished by Customer.

### 5. LIABILITY

LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

### 6. WARRANTY

LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

### 7. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

### 8. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

### 9. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

## TERMS AND CONDITIONS

### 1. PRICE LIST

The prices set forth above may be changed without notice; however, any price change will be subject to the approval of the U.S. Office of Education Contracting Officer.

### 2. PAYMENT

The prices set forth above do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to LIPCO.

### 3. REPRODUCTION

Materials supplied hereunder may only be reproduced by not-for-profit educational institutions and organizations; provided however, that express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

### 4. CONTINGENCIES

LIPCO shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay, (a) is due to events beyond the control of LIPCO including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond LIPCO's control and without negligence on the part of LIPCO, or (c) is due

to erroneous or incomplete information furnished by Customer.

### 5. LIABILITY

LIPCO's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall LIPCO be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

### 6. WARRANTY

LIPCO MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

### 7. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of LIPCO.

### 8. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with LIPCO to pay any invoice when due or to accept any shipment as ordered, LIPCO may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of LIPCO in exercising any right hereunder shall waive any rights of LIPCO or modify this Agreement.

### 9. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.
